

PS03: JAMS Functions II – The Prescreen Assessment and Creating PDF Documents

The JOFI Prescreen Assessment

The Prescreen is the simplest JOFI assessment. In Figure 1, there are five Prescreen test takers records with names, custom IDs, Status, two scores (Score and Energetic), and an option to view.

Prescreen Dashboard

- The status column indicates progress (not started, progress saved, assessment completed) as well as icons that indicate whether other assessments were assigned: a brain for Thinking Skills, a person for Personality, and a heart for Career Interests.
- The Score is a simple score of 1–9. There is no further detail for the Prescreen assessment. The Energetic score adds data from the assessment characteristic of physical occupational roles. If the job you are trying to fill is primarily a “desk job” requiring normal amounts of physical activity, use the Score column. If the job is highly physical, use the Energetic column.

The JOFI Prescreen Assessment *(continued)*

If you wish to assign further assessments to individuals that have taken the Prescreen, simply check the box by the name of one or more relevant individuals. A pop-up will appear; choose the assessments you wish to assign and click the Assign Tests button; invitations will be emailed / texted to the test takers.

The screenshot shows a table of test takers with the following details:

For general guidance on the use of scorecards and job fit reports, note:

- Assessment scorecards should be considered personal and confidential information.
- Individual scorecards (with red, yellow, green categories) are not shared with candidates or career navigation participants.
- Scorecards are for recruiters and coaches only and should be treated as confidential employee / client / student records.
- The JOFI Job Fit Report is designed to be shared with test takers.
- JAMS allows Users to make it possible for test takers to obtain a JOFI Job Fit Report for themselves.
