

B-10: JOFI User Certification

JOFI Assessments offers Thinking Skills, Personality Traits and Career Interests assessments for use in skills-based hiring, career navigation, and team building activities. We also offer a JOFI User Certificate.

Learning how to use JOFI Assessments typically requires three training sessions, and we offer four different modules of training on a regular schedule (details below).

The JOFI Assessment platform functions in an intuitive way and a single series of trainings is effective for most users. In addition to the JOFI training modules, leaders can ensure adequate institutional knowledge by evaluating and certifying staff. The certificate provides assurance that users are highly competent in their use of the JOFI Assessment Management System (JAMS). The JOFI User Certificate is offered as a free service to all JOFI customers. We recommend that every customer organization have two or three certified users on their team to act as internal experts and ensure the organization derives full benefit from the assessments.

JOFI Users who attend the three modules relevant to their work are invited to schedule a structured question and answer session that will award the JOFI User Certificate. The conversation, hosted on Zoom with James (JOFI Product Manager), will cover 50 items drawn from the training modules. A list of 50 items is provided on the next page, and JOFI Users are encouraged to use it as a check list to test themselves prior to scheduling the review.

The four JOFI training modules include:

- **Module 1 - JOFI Assessment Management System (JAMS) Quick Start Training.** Offers basic training for sending JOFI assessment invitations, viewing assessment results, and editing test taker records.
- **Module 2a - JOFI Essentials for Skills-Based Hiring.** Looks at JOFI assessments from the perspective of Talent Acquisition tasks and focuses on how to interpret the Scorecard.
- **Module 2b - JOFI Essentials for Career Navigation.** Looks at JOFI assessments from the perspective of Career Navigation tasks and focuses on the Job Fit Report, [CareerNavigation.org](https://www.careernavigation.org), and JOFI Employability certificates.
- **Module 3 - JOFI Job Fit Theory and Advanced Score Interpretation.** Introduces background on the theory behind each of the JOFI assessments and the idea of Job Fit.

Talent Acquisition staff typically attend modules 1, 2a and 3, while Career Navigators typically attend 1, 2b and 3. Completion of one of these two tracks is a prerequisite for the JOFI User Certificate. Register for any modules you may have missed here: [jobfitscore.com/training](https://www.jobfitscore.com/training).

Once you have completed your module track, email James at support@jofiscore.com to schedule your certificate review meeting.

JOFI Certification Checklist

The following items are covered in the standard JOFI training modules. You can use this checklist to test your own knowledge and to prepare to earn a JOFI User Certificate.

In Default Settings

1. Access User Profile (name, email, cell phone)
2. Show Complete notification setting
3. Show Team Default setting
4. Show Email Signature
5. Show Test selection default setting
6. Show Score Profile default setting

Emails

7. View an Invitation copy and default settings
8. View Congratulations copy and default setting

Invitations Menu:

9. Create invitation (manual)
10. Create invitations (bulk upload)
11. Search invitations
12. Sent via (Show Invitation record)
13. Show Assigned Tests
14. Copy Assessment Link
15. Copy Navigation Link
16. Confirm proper Invitation template for most recent invitation
17. Confirm proper Congrats template for most recent invitation

Scorecards

18. Search Test Takers
19. Describe Scorecard header information
20. Describe Scorecard Thinking Skills scores
21. Describe Scorecard Personality Scores
22. Describe Scorecard Career Interest Scores
23. Describe Career Interest One and Two-Letter Match Scores
24. Describe Score Profiles and Starred Items
25. Describe JOFI score (raw score) and Five-Star Rating
